Make use of every inch – whether in a tiny powder room or in a sprawling master bath – with these quick tips

MY BATHROOM IS TEENY, ANY STORAGE TRICKS?

Yes! These simple solutions will control clutter and free up precious space.

STASH TOWELS UP HIGH.

Overhead wall space often goes unused. Have tall ceilings? Install a metal or wood shelf above the door frame to act as bonus storage for towels and linens.

MOVE MEDS ELSEWHERE.

Storing medications in the bathroom is not ideal — humidity and high temps can cause them to degrade. If possible, keep them in your bedroom.

CREATE YOUR OWN "SALON."

Under the sink is the best spot for beauty necessities. Hang your hairdryer and curling iron on Command hooks inside the cabinet door. Then fill one side of the cabinet with Elfa drawers or other stackables to hold hairspray bottles, brushes and more.

HOW TO MAXIMIZE YOUR MEDICINE CABINET

Think of it as a control center where you store your everyday high-use items.

MAGNETIZE THE DOOR.

Install magnetic strips (typically used for kitchen knives) to hold small tools like nail clippers, tweezers and an eyelash curler.

MAGNETIC STRIP, \$20, SURLATABLE.COM

CORRAL WITH CANISTERS.

Deck out shelves with lidded acrylic canisters they're excellent for holding cotton swabs and applicators and won't shatter if they tumble out.

ACRYLIC **CANISTER** WITH LID, \$4, CONTAINERSTORE.COM

SORT BY A.M. VS. P.M.

Put lotions, potions and skincare essentials in two organizers one for morning, one for night. Take one out at each time. COMMAND **CADDY**, \$6, WALMART.COM
